Lukas Juodikis

UX/UI Designer & Frontend Developer

lukas@juodikis.com +370 678 21055 Vilnius, Lithuania linkedin.com/in/juodikis

Profile

Frontend engineer with a UX/UI design background. For over ten years I have built web applications and turned complex design systems into clean, accessible code, with a focus on simplicity, performance and usability. I prefer functional minimalism and teams built on trust and open communication. I use AI-assisted workflows in both design and frontend work.

Experience

UX Designer

Nov 2019 – Present

Miles · Vilnius

- Designed and built web products for clients in energy, oil and gas, shipping, retail, aviation and event management, from UX research to frontend code.
- Built the frontend of a voyage management system for Hagland Shipping (Vue.js, GraphQL).
- Built the frontend of the Tappin event platform (React), designed the application and led usability testing of its beta.
- Designed workflows, dashboards and wireframes for Stimline, Rotor Systems (GreenDrill), Link Retail and Wattn, including a design system and A/B tests for EV smart charging.

Senior Frontend Developer

Nov 2016 – Nov 2019

Devbridge · Vilnius

- Built custom Angular and React apps. Set up the client-side application and owned most of its logic.
- Planned sprints, guided the team, improved development processes, and handled monitoring, optimisation, feature development and maintenance.
- Built frontends for United Airlines (seatmap redesign, React) and the Art Institute of Chicago (ticketing, AngularJS).
- Designed and built the React frontend of Data Masters for Schroders, a set of applications that replaced departmental Excel sheets, Access databases and old tools with one source of data.
- Projects included banking and airline services.

Designer

Aug 2014 – Jul 2016

MailerLite · Vilnius

- Designed and prepared custom newsletter templates, web forms and pages.
